MACHINE LEARNING | DEEP LEARNING (PYTORCH), AWS SAGEMAKER, P

AWS-certified AI Practitioner and Data Automation Specialist with a strong foundation in Python & Statistics. Proven track record in optimizing the ML lifecycle by building SQL-driven data pipelines, developing Agentic AI SOPs, and creating automation tools that improved team productivity by 20%.

SKILLS

Python (NumPy, Pandas, Scikit-Learn) | SQL | Tableau | Power BI | Microsoft Excel | Feature Engineering & Model Optimization | Model Deployment (Batch / Real-time) AWS Cloud | (Bedrock/Sagemaker/Lambda/EC2/S3) | Transformers(Hugging Face) | Probability and Statistics

WORK EXPERIENCE

AMAZON, Hyderabad

March 2026 - Present

AI Benchmarking Specialist

Strategized and deployed agentic AI solutions and LLM-powered tools tailored for high-volume Amazon sellers.

- Facilitated in planning and executing benchmarking exercises for AI models, including defining test plans, metrics, and acceptance criteria across accuracy (improved to 99%), robustness, bias, and reliability.

AMAZON WEB SERVICES (AWS), Bengaluru

October 2024 - March 2026

Machine Learning Data Associate II

Prepared, validated, and annotated large-scale datasets across text, code (QAL), and computer vision (image/video) using Python (Pandas, NumPy), SQL, and Tableau, ensuring 99%+ data accuracy.

- Engineered high-precision datasets for Agentic AI across Finance, Mortgage, Health, and Legal domains, maintaining a 99%+ accuracy rate across 10+ initiatives, including Red-Teaming and Mathematical Evaluation.
- Authored Standard Operating Procedures (SOPs) for complex annotation guidelines, which decreased guideline-related errors by 15% and reduced rework for a team of 200 associates.

AMAZON, Delhi (Remote)

September 2023 - March 2024

Artificial Intelligence Associate

- Improved AI accuracy to 99% and reduced rework; generated performance dashboards using **Python/Excel**.
- Monitored associate productivity and delivered feedback, achieving **99.5% dataset accuracy** and consistent SLA adherence.

STUDYCZAR, Delhi

September 2016 - August 2023

Educator

Taught Physics and Mathematics. Guided and managed student performance of 80+ students and improved results bringing average score to above 86%.

EDUCATION

B.Tech in Electrical and Electronics Engineering

National Institute of Technology Sikkim, Ravangla, Sikkim

Class 12th

Govt. Senior Secondary School Mangan, Mangan, Sikkim

Class 10th

Govt. Secondary School Gor, Gor Sikkim

CERTIFICATES

AWS Certified AI Practitioner

(12/2025 - Present)

Knowledge of artificial intelligence (AI), machine learning (ML), and generative AI concepts and use cases.

Google Data Analytics Professional Certificate (04/2025)

I mastered key analytical skills, including data cleaning, analysis, and visualization, using tools such as SQL, R programming, and Tableau.

The Project Management Course: Beginner to Project Manager (01/2024)

Performed the project manager role. Waterfall and Agile project management, performed with Scrum.

PROJECTS

Lead developer, A COMMAND BASED ROBOTIC CAR USING RASPBERRY PI

Bengaluru

- **Hardware Integration:** Engineered a Raspberry Pi-based robotic vehicle with a 4-motor drive system, achieving a 30% reduction in component count through optimized circuit design while maintaining 100% power distribution safety.
- **Software Control:** Developed a Python-based control interface that reduced command-to-execution latency to under 50ms, enabling real-time directional adjustments via terminal commands.
- **Technical Implementation:** Safely integrated motor drivers and Raspberry Pi GPIO pins on a breadboard, achieving a compact footprint that allowed for a 15% increase in chassis space for potential sensor expansion.

Lead Developer, SAGEMAKER SMART STATS

AWS

- Independently developed "SageMaker Smart Stats" (Userscript for productivity metrics), increasing team productivity by 15–20% and saving approximately 45 minutes per associate daily.

HONOURS/AWARDS

Prime Player Award (Feb & Apr ' 25) & Leadership Recognition:

- Recognized for achieving the highest productivity and reliability metrics across the team.
- Received multiple shout-outs for delivering diverse tasks, including agentic AI SOP development and multilingual dataset creation.
